## Education

### Purdue University

(B.S.) Computer Science – GPA: 3.79

Relevant Courses: Data Structures & Algorithms, Systems Programming, Operating Systems, Web Applications

West Lafayette, IN

August 2016 - December 2019

## Skills

**Proficient:** JavaScript, TypeScript, React.js, HTML, Java, Python, C#, SQL Server, Nx, Azure

**Basic:** CSS, MySQL, Docker, Apache Kafka, GraphQL

## Work Experience

### Microsoft

Software Engineer 2

Redmond, WA / Remote

February 2020 – Present

- Led feature development team of 5 junior engineers for rewrite of most visited page (65K DAU / 600K daily page views) from Angular.js to React, leading to 27% less runtime errors, 73% load time decrease, and 96% increase in customer satisfaction score
- Sole tech lead for scaling out monorepo from single legacy Angular application to 13 React microfrontend applications, owned by 9 teams (75 engineers total) using Nx and Webpack module federation

### Bloomberg L.P.

Software Engineer Intern

New York City, NY

May 2019 – August 2019

- Migrated the rendering of newsletters from 3rd party vendor to a micro frontend container in Typescript, used for dynamically rendering client-side modules on [bloomberg.com](#)
- Created a microservice using Typescript, Redis, and MySQL to serve compiled HTML, JS, and CSS templates on [bloomberg.com](#) at scale (75,000 requests/second)

### Purdue University

Teaching Assistant – Software Engineering

West Lafayette, IN

August 2018 – May 2019

- Taught SCRUM methodology, graded assignments, facilitated discussions, and provided feedback to improve students' programming and architecture design skills
- Improved students' problem solving skills by holding weekly help sessions in a group setting

### JPMorgan Chase & Co.

Software Engineer Intern

Chicago, IL

June 2018 – August 2018

- SCRUM Master for a team of four interns to manage the design and implementation of testing automation for a corporate banking payment platform
- Architected an extensible automated testing frameworks in Java and Typescript, which prevented hours of manual testing and increased time efficiency for building and deployment

### Object Edge

Software Engineer Intern

Walnut Creek, CA

May 2017 – August 2017

- Engineered a real-time, customer intent microservice using Java, Apache Kafka, Redis, and Docker at scale (5000 queries/second) to improve product recommendations for customers
- Improved quality of client's Customer Service Portal by using React JS, GraphQL, and Java to add features and resolve 30% of bugs in code base

## Leadership

### Hello World (<http://bit.ly/2YTSLfw>)

User Experience Team

April 2017 – September 2019

- Coordinated logistical efforts, managed event scheduling, and mentored students in Web Development for Purdue's 250+ attendee Beginner-Oriented Hackathon, which incorporates incoming Freshmen into Purdue's Computer Science community

### Purdue Hackers (<http://bit.ly/2Knt4zR>)

Web Master

March 2018 – May 2019

- Managed the development, deployment, and maintenance of the main portal for 1500+ members to use and stay connected with the Purdue Hackers organization
